

Process for Portal Patients

The registration process for QIM's eMDs Patient Portal:

Follow instructions carefully in the introductory email sent to you. The eMDs Portal can only be accessed from a laptop or computer and NOT from a mobile phone. You will be directed to a Create New Account web page.

Create a user name and password and click Submit button to complete the registration. At that point, a confirmation message is displayed. The message tells you that a link to the login page has been sent to your email address. You can use that link to access the global login page for Patient Portal 2.3.

If you had previously registered for eMDs Patient Portal 2.3 (with a different medical office), and your demographic data matches the data entered during the previous registration, the system displays a login page, you can use your existing Portal account to log in to the Patient Portal.
